MISSOULA GREEN BUILDING INITIATIVE

The Missoula Green Building Initiative™. Your source for practical green building information.

Missoula Green Building Initiative

Who We Are

The Missoula Green Building Initiative™ is a new program developed by the Missoula Building Industry Association to promote and facilitate practical approaches to green construction.

What We Do

We help you use green building to your advantage. MBIA created the Missoula Green Building Initiative™ to serve as an education and marketing resource for members—to help you build energy efficient and environmentally sustainable homes. Our program is based on the new National Association of Home Builders Model Green Home Building Guidelines.

In addition to providing educational resources, locally relevant guidelines and a rating system, we are also working to educate consumers—to help them understand green and ensure a continued market for green built homes.

Our Goal

Our goal is to help you leverage this important trend to make your business stand out in the marketplace. We will give you all the tools you need to implement green building strategies that work for you, and to market green homes to your customers.

With the Missoula Green Building Initiative™, our goal is to help you stay ahead of the curve so you can differentiate your business in the marketplace and satisfy customer needs.
